Insurance and financial services	1.10487	100.68	-0.5	-1.7	0.1	-0.005	0.002
Miscellaneous goods and services	3.72905	108.07	0.7	2.4	4.4	0.025	0.164

(1) This figure refers to the percentage variation of the index from the previous month to the current month.

(2) This figure refers to the percentage variation of the index from December of the previous year to the current month.

(3) This figure refers to the percentage variation of the index between the current month and the same month of the previous year.

(4) The sum of the impacts is equal to the monthly variation of the CPI, and it may vary if calculated with more decimals.

Monthly increases were observed in twelve of the fifteen classes of food and non-alcoholic beverages. The most important increases were in meats (1.8%), which had an impact of 0.091 pp, and dairy, vegetable beverages, and eggs (2.2%), whose impact was 0.060 pp. Of the eighty-one products of the division, fifty-four increased in prices, notably chicken poultry (3.0%), which had an impact of 0.033 pp, and beef (1.2%), which had an impact of 0.027 pp. The remaining products with positive influences had a combined impact of 0.261 pp.

### Division 12: Insurance and financial services

A monthly decrease was observed in one of the two classes of this division. The decrease was observed in the class of insurance (-0.7%), which had an impact of -0.006 pp. Of the two products of the division, the decrease was in insurance (-0.7%), which had an impact of -0.006 pp.

## Products

### Electricity supply\*

In July, the monthly variation of this product was 7.3%, which had an impact of 0.239 pp on the variation of the overall CPI. The cumulative variation was 19.1%.

### Bundled telecommunications services

The monthly variation in the price of this product was 3.9%, which had an impact of 0.051 pp, and the cumulative variation was 3.9%.

### Accommodation services

The monthly variation in the price of accommodation services was 7.4%, which had an impact of 0.048 pp, and the cumulative variation was 3.9%.

### Gasoline

The monthly variation in the price of gasoline was 1.3%, which had an impact of 0.039 pp, and its cumulative variation was 1.2%.

### Mobile telephone equipment

The monthly variation in the price of this product was -5.9%, which had an impact of -0.049 pp, and the cumulative variation was -5.7%.

### Tomatoes

The monthly variation in the price of tomatoes was -14.3%, which had an impact of -0.049 pp, and the cumulative variation was -0.1%.

\* The variation in the product is due to changes resulting from Decree 14T, which was enacted on 25 May and published on 8 July. The changes are related to the establishment of average prices in the national electricity system (<https://www.bcn.cl/leychile/navegar?idNorma=1214771>).

### Development of product prices

The CPI is used for the following purposes:

- Official measurement of inflation in Chile.
- Determining factor in the variation of the UF and UTM.
- Measurement for adjusting and updating contracts and monetary values.

With our **calculator**, you can adjust values and calculate the variation of the CPI over time for any period you choose ([www.ine.gob.cl](http://www.ine.gob.cl)).
